oversees an affiliated institute, the Postgraduate Institute of Management, which has extended its reach to the Middle East, providing crucial postgraduate education in management studies.

In its commitment to offering a comprehensive undergraduate experience, the university is presently engaged in expanding its infrastructure. This includes the construction of a new faculty complex for the Faculty of Engineering in Mattegoda, as well as new faculty complexes for the Faculties of Humanities and Social Sciences, and Management Studies and Commerce at the university premises in Gangodawila. At present, the university hosts 86 departments covering a diverse array of fields, a number that continues to grow.

Demonstrating its prowess in research, the university recently achieved the distinction of being ranked as the 3<sup>rd</sup> Best University in Sri Lanka according to Webometrics World Ranking.

The university is also home to 23 research centres focused on various fields in Science, Management, Humanities, Medicine, Engineering and Technology.

Our faculty was established in 1993, as the sixth Faculty of Medical Sciences in Sri Lanka. Every year, students select our faculty over many others, established before ours.

In keeping with the faculty goals, the medical and health graduates produced by the Faculty of Medical Sciences of USJ are enriched with the necessary knowledge, skills, attitudes and mind set to provide health care services in any part of Sri Lanka. The journey to acquire knowledge and skills does not end with the conferment of a degree. It needs to continue to proceed forward aspiring at excellence. The MBBS and Allied Health Sciences degrees mark the beginning of a life-long journey of acquiring knowledge, improving skills, communication, professionalism and humanism in serving mankind and engaging in health sciences research of national priorities. While congratulating the happy recipients and their proud parents, I consider it my duty to also commend the commitment and enthusiasm of the excellent academia of the Faculty of Medical Sciences and the extended staff of our main affiliated teaching hospitals - Colombo South Teaching Hospital, Sri Jayewardenepura General Hospital and Homagama Base Hospital for the assistance they have rendered in this regard. **POSTGRADUATE RESEARCH SERVES AS A CONDUIT FOR THE GENERATION OF NEW KNOWLEDGE**

In my role as the acting Dean of the Faculty of Graduate Studies at the University of Sri Jayewardenepura, I am delighted to extend my heartfelt congratulations to all of you on the occasion of your convocation. This significant milestone is a source of immense pride, a testament to your achievements, and a cause for celebration. Your

dedication, unwavering commitment, and resilience have played an indispensable role in making this moment a reality. We are deeply appreciative of the opportunity to support and facilitate this journey, made possible through the remarkable collaboration of all the faculties at our university.

Postgraduate research holds immense significance in advancing human knowledge, fostering innovation, and addressing complex challenges across various disciplines. It plays a pivotal role in shaping the trajectory of academic, industrial, and societal progress. Postgraduate research serves as a conduit for the generation of new knowledge. It enables scholars to delve deep into their chosen fields, exploring uncharted territories, and uncovering novel insights. By conducting rigorous research, scholars contribute to the expansion of theoretical frameworks, empirical data, and methodologies, which form the bedrock of progress in any field. This cumulative knowledge not only enriches academia but also lays the foundation for informed decision-making in various sectors.

Further, many groundbreaking technological advancements are borne out of postgraduate research. Researchers in fields such as engineering, computer science, medicine, and the natural sciences drive innovation by pushing the boundaries of existing technologies. Through their rigorous inquiry, they develop new algorithms, invent novel materials, and pioneer revolutionary solutions to contemporary challenges. These innovations not only fuel economic

growth but also improve the quality of human life. This is doubly important at a time like today where Sri Lanka is facing an economic crisis and these new innovations have the potential to play a pivotal role in economic gain.

In today's interconnected world, many of the most pressing challenges require multidisciplinary solutions. In the Faculty of Graduate Studies of USJ, postgraduate research with collaborations across diverse fields is encouraged as it fosters an environment where scholars from different backgrounds come together to address complex problems. This collaborative approach leads to innovative ideas that draw on insights from multiple disciplines, enriching research outcomes and promoting holistic solutions.

I am sure that the output from the postgraduates who will be receiving their postgraduate degrees today will have a profound impact on society. Their findings have the potential to influence policy decisions, drive social change, and address pressing issues such as healthcare, climate change, poverty alleviation, and technology ethics.

The pursuit of postgraduate research cultivates experts in various fields. Thus, it is hoped that the postgraduates from the Faculty of Graduate Studies will become the driving force behind educational institutions, industries, and research organizations in Sri Lanka and that their expertise will contribute to the training of future generations of researchers, creating a cycle of knowledge transfer and continuity that is crucial for the progress of humanity. I extend my heartfelt wishes to all the postgraduates graduating today, hoping for their future endeavours to be filled with success and fulfilment.
